

SG 2 SDM Training

- Visits to Denmark completed: the German UKSH-team successfully visited the Danish implementation modules Teach The Teacher (TTT) and Teach The Leader (TTL). They will now look at how they can transfer the concepts to Germany and develop their own approaches accordingly.
- MAPPIN'SDM rater training: Antje of the CFFB-team are currently taking part in MAPPIN'SDM's German rater training programme. They are learning how to use the measurement tool to assess video recordings of doctor-patient consultations with regard to the existing SDM level.
- Co-operation between SHS and Kiel: as feedback is used as a training method in both clinics, both partners will exchange experiences and potentially develop a joint concept

warm greetings **Anja and Dorte**

SG 3 Decision Aids

- German Decision Aids in Denmark: NFS' paediatric department is interested in trying out German PtDAs in Denmark. To this end they will review decision aids clustered around Juvenile Rheumatoid Arthritis and Appendicitis. A first adapted version might feature Danish texts and subtitles videos.
- Beslutningshjælper Translation: A WHO-compliant German translation of the Beslutningshjælper template has been created, comprised of a twin translation, blinded twin back-translation and successive consensus-finding.
- Encounter Tools in Germany: Based on the translated template, at least three paper-based encounter tools will be developed and tested in German hospitals. At this point they will probably be on the following topics: early-stage prostate cancer, epilepsy, and artificial insemination.

warm greetings **Margit and Felix**

SG 4 Patient Activation

- On 28.05.2024, following our meeting at UKSH with INTERREG, there was another small group discussion with Janey, Carmen, Diana (Malteser) and Marianne (Nykobing Falster). We gave each other an insight into the circumstances of the respective hospitals and considered together how we could gain even more experience and meet the needs of patients with regard to patient information. Idea: Malteser International will include a question on patients' information needs and satisfaction in its follow-up survey in June.
- On 04.06.2024 our de-dk Patient Workshop No.1 took place in Flensburg. We were able to engage in a very exciting exchange with seven participants about their experiences as patients and also as relatives in the hospital environment. We will incorporate the insights gained into our further work in the Patient Activation sub-goal.
- Plans: Helios will be organising a patient workshop on 26/09/2024.
OUH is planning its patient workshop on 05.10.2024.
We are currently looking for a new date for our next joint workgroup meeting.
We will get in touch with you!

warm greetings **Antje and Julia**

SG 5 SDM Concept

☀️ The summer holidays are over
...and we have noticed in SDM Concept. 🍁🔥

In early September, Anja and Mette met in Flensburg to start the work and plan ahead for the working group 🤝. Based on that meeting, we decided to split SDM Concept into two parts: interest-specific work groups and a core group. The interest-specific work groups will focus on two exciting topics that you, as partners, can dive into – „Leadership“ and „SDM-Culture.“

These groups will meet a few times throughout the project, starting in 2025, to share experiences, thoughts, and reflections on how we each experience leadership or SDM culture in our SDM work. We're confident this will be an interactive and insightful journey where we'll shape the future of SDM together.

And remember – the SDM Concept goal is ambitious! We aim to develop an EU-wide implementation plan for Shared Decision Making. By participating in one of the interest-specific work groups, you have a unique opportunity to share your insights with us in the core group, which will influence the EU implementation plan.

We're just getting started and can't wait to take this journey with you! 🚀

P.S. Stay tuned next month to hear more about the „Leadership“ theme and how that interest specific work group will be organized!

warm greetings Anja and Mette
