

SG 1 Management

- **New Team Member:** There is someone new in the project team. We were very happy to welcome Annemarie Bansgaard – the newest addition to the DAILY SDM family. Annemarie is now with CFFB at Sygehus Lillebælt and as project coordinator will help us push forward.

warm greetings **Annemarie and Felix**

SG 3 Decision Aids

- **Tysk Beslutningshjælper:** The official version of the German version decision aid encounter tool is ready. It consists of the German manual, Pros and Cons Card Template, envelope template and prep sheet template.

warm greetings **Margit and Felix**

SG 4 Patient Activation

- **Exciting workshops for patients and relatives as part of Daily SDM:**
In 2024, a number of important workshops are on the agenda to promote dialogue between patients, relatives and professionals. Here is an overview of the events:

4 June 2024: German-Danish workshop in Flensburg
26 September 2024: Workshop at the Helios Klinikum Schleswig
5 October 2024: All-day workshop at Odense Universitetshospital
12 November 2024: Workshop in Nykøbing/Falster

We will compile the valuable findings from these workshops in the online meeting of the Patient Activation team on 22 November. The aim is to work out concrete steps for further development. Before the end of the year, we want to decide which Daily Partners will work on the specific prototypes for patient activation, either individually or as part of a team.

warm greetings **Antje and Julia**

SG 5 SDM Concept

DO YOU WANT TO BE PART OF AN INTEREST SPECIFIC WORK GROUP, FOCUSING ON LEADERSHIP?

In the SDM Concept core working group, we have now scheduled our next meeting for November 6. Selected members from UKSH and CFFB will participate, with the focus on discussing implementation strategies to support the development of a common European implementation plan for shared decision-making.

We are also launching an interest-specific working group focused on leadership during the implementation of shared decision-making. It is still unclear which format the interest specific work group will take, as both workshop and online formats are being discussed right now.

But the discussion topics have already been finalized and will include:

- General experiences with leadership during SDM implementation
- What role should a leader take?
- Who drives the process?
- When has leadership worked well—and when has it not?

We will keep you posted – please contact Anja and Mette, if you are interested in joining the work group.

warm greetings **Anja and Mette**
